Education

University of Manitoba - B.Sc. Computer Science Major

Sep 2020 - Present

- Relevant courses: Software Engineering, Artificial Intelligence, Databases implementation, Human-Computer Interaction, Data Structures.

Projects

Winnipeg Urban-Planning System (Java, SQL)

Sep 2023

- Developed a system that addresses the issue of inefficient urban planning in Winnipeg by delivering actionable insights, contributing to more effective and strategic planning solutions.
- Utilized the City of Winnipeg website to extract live data, enhancing the database with up-to-date and precise information.
- Achieved a 20% reduction in project delivery time, measured by the timely completion of all milestones, by implementing agile methodologies and fostering cross-functional collaboration.
- Applied Java for programming and demonstrated proficient use of SQL for effective database management. Acquired and honed skills through dedicated learning, resulting in enhanced proficiency in both languages.

Food Rating Website (JavaScript, CSS, HTML)

Sep 2023

- Designed a prototype enabling users to view and rate nearby restaurants using Java, CSS and HTML.
- Conducted user interviews and surveys to gather valuable insights, informing the design of the website to align with user needs and enhance user experience (UX).
- Developed interactive prototypes using prototyping tools to experiment with various interface styles, aligning with users' needs and preferences.
- Performed usability testing, gathered feedback, and promptly updated the interface based on new insights.

Subscription Tracker Application (Java, HSQLDB, XML, JavaScript, CSS(Bootstrap), HTML)

May 2023

- Developed a Full Stack Application for comprehensive subscription management, integrating frontend and backend components to ensure seamless and efficient handling of subscription-related tasks and data.
- Robust 3-tier architecture comprising Front-End (XML), Logic Layer (Java), and Database (HSQLDB), ensuring a well-structured and efficient system design.
- Led a dynamic team of 5, fostering smooth collaboration through Git for efficient code management.
- Implemented Agile methodologies to facilitate adaptive development and ensure timely delivery of project.
- Crafted the design with modularity in mind, strategically minimizing dependencies between tiers for enhanced flexibility and maintainability.
- Designed with modularity in mind, minimizing dependencies between tiers.

Skills

Programming: Java, Python, C/C++, SQL (MySQL), JavaScript, HTML/CSS, XML.

Libraries/Frameworks: React, Angular, Node.js, Flask, FastAPI, REST API, Django, Vue 3, Bootstrap, NumPy, JUnit.

Tools: Git, Visual Studio Code, Android Studio, IntelliJ IDEA.

Work Experience

Avis Budget Car Rental – Car Return Associate (Winnipeg, MB)

June 2023 - Present

- Perform comprehensive vehicle inspections to meticulously identify and document any damages with precision.
- Create detailed damage reports by referencing extensive records of previous contracts, ensuring documentation of any damages.

Telus – Sales Associate (Winnipeg, MB)

Sep 2022 – Dec 2022

- Achieved the title top-seller of the month by surpassing the sales target, showing a remarkable 40% increase in sales performance.
- Attained elevated levels of customer satisfaction and loyalty by employing effective communication strategies.

Extra Curricular Record

Pakistani Students Association, University of Manitoba – Public Affairs Executive (Winnipeg, MB)

Apr 2022 - Apr 2023

- Promoted Pakistani culture on campus by organizing and executing a series of vibrant cultural events, fostering awareness and appreciation within the campus community.
- Championed the successful advocacy for the reduction of health fees for international students, acknowledging and addressing the financial challenges they encounter.
- Engaged in addressing broader community issues through regular meetings with Winnipeg MLA's and city councilors. Actively participated in discussions concerning affordable housing plans for students, contributing to the ongoing dialogue on community development and welfare.
